Rebus® Intelligent Labor

Managing labor is hard. Your technology shouldn't be.

"If Rebus were no longer available, I would be looking to Longbow Advantage to offer something even better. Rebus has raised the bar to the point where I would not be looking to the standard labor management systems on the market today, but would be looking for something new that I haven't seen before."

Head of North American Warehousing, Global Food Manufacturing Company

 **rebus**
EXTENDED WAREHOUSE PLATFORM

rebus.io

Rebus Intelligent Labor is the only advanced labor management system that doesn't rely on engineered standards and costly projects.

We believe in providing a solution that meets teams where they are in their labor journey. Whether you're just starting out or you're moving towards discrete standards, Rebus is able to meet you where you are today and grow with you in the future.

Avoid Costly, Inefficient Implementations and Upgrades

F&B: 31 sites in 9 months, funded with cost savings

Reduced upfront and lifetime effort and cost. Intelligent Labor provides faster time-to-value and an increase in long-term success rate as compared to legacy systems.

Labor Strategies Are Not One Size Fits All

3PL with 9 DCs: 9% labor savings in 6 months

Because transformation isn't one size fits all, Rebus is built to scale from time-based to more discrete standards as your organization's needs change over time. Move away from manual tracking and spreadsheets to total control in real-time.

Leverage a Smarter LMS That Works with You

Average decrease in cost-to-serve of 21%

While most labor management systems struggle to keep up with the evolving changes to products, locations, and processes, Rebus Intelligent Labor leverages the historical data of your warehouse operations to get smarter over time without disruptive and costly projects.

"After a little over six months on Rebus Intelligent Labor, our annualized savings was approximately 9% off labor spending."

Ryan Donoghue

Director of Operations & Continuous Improvement, Accuristix
